

FOR IMMEDIATE RELEASE

Discover the Trillion Dollar Space Economy in "Fortitude," the Upcoming Groundbreaking Documentary by Award-Winning Filmmaker Torsten Hoffman

Join the NewSpace Revolution and Be Part of the Future

Los Angeles, CA – Award-winning independent filmmaker Torsten Hoffman and his international team are excited to announce the launch of their Kickstarter campaign for the groundbreaking documentary "Fortitude: Forging the Trillion Dollar Space Economy." Three years after the global success of *Cryptopia* in the controversial blockchain industry, the German/Australian director now explores the people, perils, and promises behind the emerging NewSpace industry, where influential individuals with utopian ideas and vast fortunes are forging a trillion-dollar off-world industry that inspires millions back here on Earth.

With more than 80 interviews conducted on four continents, "Fortitude" is over 90% complete, showcasing the risks, investments, and innovations turning science fiction into science fact. As independent filmmakers, the production team has maintained creative freedom and financial risks but now seeks support to bring the project over the line through its [Kickstarter campaign](#).

"Fortitude" offers a unique look at the Earth-to-Space economy (rockets and astronauts), the Space-to-Earth economy (satellite services and data), and the newly emerging Space-to-Space economy (private space stations, in-orbit services, asteroid mining). The film also explores the level of government involvement in the privatization of space.

Featuring representatives from NASA, ESA, U.S. State Department, UKSA, United Nations Office for Outer Space Affairs, RocketLab, Voyager Space, Planet Labs, Virgin Galactic, SpaceLogistics, Axiom Space, Spire Global, Privateer, Astroscale, Viasat, Space for

Humanity, Interstellar Lab, Eutelsat, OrbitFab, Seraphim Space, Secure World Foundation, Exolaunch, XPrize, AstroAccess, and the White House, among others, this documentary offers a rare insight into the entire NewSpace economy beyond Elon Musk and SpaceX.

By participating in the Kickstarter campaign, backers can access exciting rewards, such as sending their photos (or actual DNA) to the Moon on a SpaceX rocket with Firefly, launching in early 2024. With various pledge levels, there are opportunities for everyone to become a part of this monumental journey.

Torsten Hoffman, the award-winning German/Australian filmmaker behind "Fortitude," has a history of identifying trends and changes in the market, sharing his insights with the public through his documentaries, such as "Cryptopia" (2020) and "Bitcoin: The End of Money as We Know It" (2015) which introduced global audiences to Bitcoin.

Join the NewSpace revolution and be part of the future. Uncover the future of space exploration, support the Kickstarter campaign for "Fortitude: Forging the Trillion Dollar Space Economy," and help bring this dynamic documentary to life. Multiverse Media is the co-production partner, and Screen Australia supported the project in 2021.
